## WORK EXPERIENCE

### Software Engineer Fidelity Investments

10/2020 - Present

Bangalore

**Environment:** Spring 4.x, PL/SQL, Hibernate 5.x, Maven, Eclipse, JIRA, GIT, Angular 7, Tomcat 8, JUnit, Agile, Postman, Jenkins, AWS

**Roles/Responsibilities**

- Developed **REST** API's using **Spring MVC** and **Spring boot**, hosted all **micro services** on **AWS** and configured environments.
- Developed the application using **Angular** framework that leverages component-based architecture, also configured dependency Injection and developed the NPM component library. Developed Data layer using Hibernate framework and wrote POJO classes.
- Worked on setting up **Maven** to build, package, and deploy application code to the target **Apache Tomcat** Servers and worked on continuous integration servers like **Jenkins**.
- Developed the persistence layer using **Hibernate Framework** by configuring the various mappings in hibernate files and created **DAO** layer.
- Involved in various phases of **Software Development Life Cycle (SDLC)** as requirement gathering, modelling, analysis, architecture design & development and worked with the business team to review the requirements.
- Used **Spring Security** for **Authentication** and **Authorization** of the application.

### Full Stack Developer Cognizant

09/2018 - 09/2020

Bangalore

**Environment:** Spring 4.x, PL/SQL, Hibernate 5.x, Maven, Eclipse, JIRA, GIT, Angular 7, Tomcat 8, JUnit, Agile, Postman

**Roles/Responsibilities**

- Involved in designing Spring Boot application and Hibernate to design module structure.
- Developed Data layer using Hibernate framework and wrote POJO classes.
- Developed a database auditing system using Debezium, kafka, Docker, postgres, AWS(EC2, Amazon CloudWatch Logs, Aws Lambda).
- Worked upon Services, Components and Routing in Angular 7.
- Enhancing the product as per client requirement.
- Involved in building the RESTful web services.
- Worked on Junit for unit testing of the application.

## CERTIFICATES

### S1 Full Stack Engineer

Stackroute

## PERSONAL PROJECTS

### CPlayer (06/2019 - 08/2019)

- Search player based on keywords. Gets news from third party api . Stores player in database based on user.
- Technology Stack: Spring Boot, Angular, Docker, JWT and Maven.
- Link: <https://cplayerfront.herokuapp.com/>
- GitHub Link: <https://github.com/micgogi/Cplayer>

### Prediction-linear-regression (07/2017 - 01/2018)

- Description: Comparing accuracy of algorithms on predefined datasets.
- Technology Stack: Python, Node Js and Numpy(library).
- GitHub Link: <https://github.com/micgogi/predictions-linear-regression> .
